- 8 Feedback
- 10 Who's Where
- 12-14 First Take
- 15 Up Front
- 16 Going Concerns
- 17 Inside Business Aviation
- 18 Airline Intel
- 20 Leading Edge
- 21 Commander's Intent
- 22 In Orbit
- 23 Washington Outlook
- 67 Classified
- 68 Contact Us
- 69 Aerospace Calendar

DEFENSE

- 24 **Airbus managers** worry about a wider impact to A400M program after production aircraft crash
- 25 **France, Germany and Italy** agree to launch two-year pan-European UAV definition study

SPACE

- 26 **Aerojet Rocketdyne looks** at buying Atlas V rights, but Lockheed Martin not interested in sharing
- 29 **Interim upper stage** for NASA's Space Launch System may need human-rating for one mission
- 64 **Shape of lightweight** composite propellant tanks in NASA demo presents fabrication challenges

26

A team comprising Aerojet Rocketdyne, Dynetics and Schafer explores how to keep the workhorse launch vehicle Atlas V viable long after ULA plans to retire it sometime in the next decade. A new ARI propulsion system in development by Aerojet is part of the plan.

COMMERCIAL AVIATION

- 33 **Privatization of TAP** gaining momentum, Portugal may sell its majority stake by end of June
- 34 **American Airlines** president sees short lifespan for "capacity discipline" at U.S. carriers
- 35 **Regional airlines in** the U.S. adding bigger next-gen aircraft that may not meet industry requirements
- 36 **China jumps ahead** in its quest to deploy an advanced satellite-based landing capability
- 37 **Business aviation sector** is experiencing a recovery—at least in the top half of the market
- 38 **Major carriers** in the U.S. and Europe are impeding progress of industry-wide liberalization

TECHNOLOGY

- 31 **NASA demonstrates** distributed electric propulsion for vertical-takeoff-and-landing UAV
- 32 **Airbus evaluates** composite wing sections to improve drag-reducing natural laminar flow
- 40 **High-altitude trials** put new Rolls engine for Boeing 787 on track for aggressive fuel-burn targets
- 41 **U.K. airship developer** uses crowdfunding to further development and flight testing
- 44 **HAV's Airlander 10** hybrid airship incorporates innovative systems and materials

ON THE COVERS

This week, Aviation Week publishes two print editions. On the cover far left, Airbus's A350 MSN002 banks right in the skies over Toulouse. Aviation Week Senior Editor Fred George flew the big twin and reports on his evaluation flight beginning on page 58. Airbus photo. Elsewhere in both editions are our annual Top-Performing Airlines study, a preview of the Paris Air Show and reports on the medium-altitude, long-endurance UAV France, Germany and Italy will develop and China's test of satellite-based landings. The cover of our MRO Edition features a Joe Pries photo of a Japan Airlines 787 at New York's JFK airport. That edition includes an additional section on maintenance, repair and overhaul. Aviation Week publishes a digital edition every week. Read it at AviationWeek.com/awst and in our app.
