JESSE H. NEAL AWARDS

Est 1955

Winner 2016

EVOLUTION OF A MAGAZINE

- 16 **Over a century** of covering the aerospace industry, we have strived to show the potential of flight to change the world
- 32 **Aviation Week's** foray in the 1970s into the then-new arena of digital imaging led to two scoops of high-level intrigue

SPIN-OFFS

- 34 **From credit cards** to overhead projectors, aviation and space technology has helped make the world we live in

THE NEXT 100 YEARS

- 38 **Richard Branson:** The future will see greater cooperation among countries, across government and private sectors
- 40 **Burt Rutan:** Curiosity, creativity and courage drive the technical breakthroughs so important to human progress
- 42 **Missy Cummings:** We stand at the cusp of having on-demand flying cars that could reduce congestion, emissions
- 44 **August Cole and P.W. Singer:** Innovation, organization and implementation will continue to triumph in future wars
- 48 **Dan Goldin:** Simplify our programs, or the U.S. aerospace industry risks drowning in ever-increasing complexity
- 52 **Tim Clark:** Government interference is the biggest obstacle to continued growth for the world's airlines
- 54 **Steve Mirmina:** In 2116, will booking a ticket on a rocket to Mars be as easy as catching a flight to Tokyo is today?
- 56 **Norman Augustine:** Augustine's newest and perhaps greatest law is published here for the very first time
- 58 **Brad Tousley:** Space has become a real-time, dynamic environment in all aspects, including traffic management

100 KEY TECHNOLOGIES

- 62 **To mark 100 years of flight,** we offer 100 innovations that made aviation and spaceflight possible, practical and useful

CTO ROUNDTABLE

- 86 **Chief technologists** of Airbus, Boeing, Lockheed Martin and Raytheon discuss what lies ahead for the industry
