- 65 Aerospace Calendar

DEFENSE

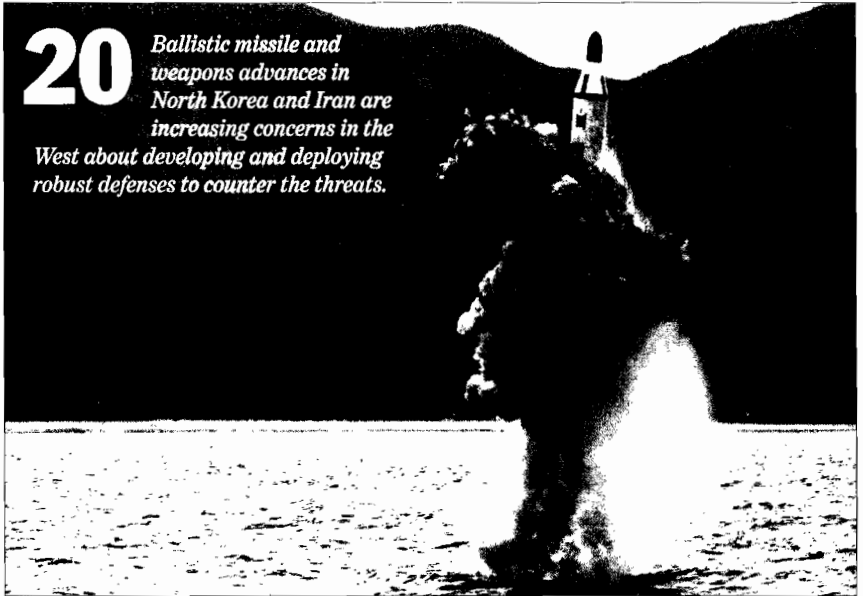

- 20 Missile technology** from North Korea, Iran, Russia and China is changing the U.S. threat calculus
- 22 U.S. Air Force** T-X competition advances with glimpses of Boeing and Northrop clean-sheet designs
- 24 F-35 has much** development testing to complete, problems to be fixed, top Pentagon weapons tester says
- 34 Five aircraft** types will be inducted into Britain's military flight training fleet in next three years
- 50 Aviation Week** joins U.S. Air Force Reserve swing-role WC-130Js on a mock mission over the Atlantic

COMMERCIAL AVIATION

- 27 Strong demand** is helping carriers based in Thailand to expand and strengthen financial results

- 28 The discrepancy** between Boeing's orderbook and its 2016 forecast suggests big-jet market downturn

20 Ballistic missile and weapons advances in North Korea and Iran are increasing concerns in the West about developing and deploying robust defenses to counter the threats.

- 30 Development** is wrapping up on Boeing 737 MAX cockpit displays designed for 737NG commonality
- 31 Connectivity**, situational awareness and human-machine interfaces are next focus for Rockwell Collins

SPACE

- 26 NASA uses funds** it did not request to develop a more powerful upper stage for the Space Launch System
- 41 Chinese space** engineers hot-test the motor for a lunar mission they hope will launch in 2028
- 44 Osiris-Rex mission** to collect asteroid dust could shed light on origins of life on Earth

CONNECTED AEROSPACE

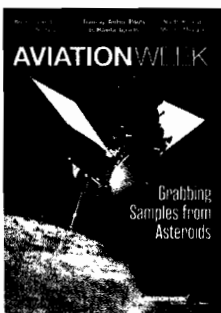

- 42 Inflight Wi-Fi** service providers forecast upbeat industry trends as they line up contracts

TECHNOLOGY

- 32 Toronto researchers** study lifting-fuselage configuration to increase efficiency for regional airliners
- 33 USAF tests** first integrated combat flight safety system to prevent air-to-air and air-to-ground collisions

ON THE COVER

Asteroids may be the key to how life began on Earth—and could wipe life out in a collision with our planet. As Japan's Hayabusa 2 cruises to sample an asteroid, the U.S. is poised to launch Osiris-Rex to grab pieces of another to advance our understanding (page 44). NASA artist's concept. Also in this issue, Boeing's widebody order gap (page 28), training airline pilots for stall recovery (page 52) and the North Korean missile menace (page 20). Aviation Week publishes a digital edition and on our app.

STATE OF STEALTH

37 Stealth vs. radar: Lower-frequency radar systems may not only detect but also engage stealth aircraft

ISR

46 Will disaggregated sensor networks render fleets of specialized reconnaissance aircraft obsolete?

SUPPLY CHAIN

48 Industry narrowing brings new risks for OEMs but also opportunities for buyers

49 Manufacturers and Tier 1 suppliers continue to streamline their supply chains, buttress cash flows

AIR SAFETY TECHNOLOGIES

52 Full stall in a commercial jetliner is an experience for which all U.S. airline pilots soon will be trained

54 New generation of laser-based air data systems offers higher performance without moving parts

WORKFORCE

57 As Silicon Valley muscled into aerospace's wheelhouse, industry's attrition concerns grow

AIRLINES IN JAPAN

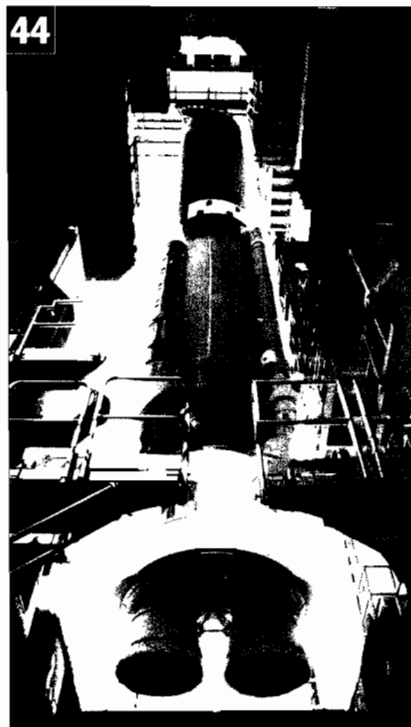

59 Boeing 787 is the centerpiece of expansion plans for Japan's largest international carrier

60 Curfew changes and runway construction could yield more flights for main Tokyo gateway

62 Conservative approach to growth and capacity constraint continue to pay off for Japan Airlines

VIEWPOINT

66 Pentagon acquisition reform should gain inspiration from the ideology of the investor
