

JOURNAL OF APPLIED MECHANICS AND TECHNICAL PHYSICS

Volume 57, Numbers 1–6, 2016

(A translation of *Prikladnaya Mekhanika i Tekhnicheskaya Fizika*)

Engl./Russ.

Volume 57, Number 1, January–February, 2016

Solution with a Linear Velocity Field for a Submodel of One-Dimensional Gas Motions – Yu. V. Yulmukhametova	1	3
Change in the Wind Flow Regime in Stratified Lakes – V. M. Belolipetskii and P. V. Belolipetskii	8	11
Marangoni Convection in a Cylinder of Finite Size – E. P. Magdenko	13	16
Numerical Analysis of Entropy Generation in a Turbulent Diffusion Flame – F. Bouras and F. Khaldi	20	24
Entropy Generation Effects in a Hydromagnetic Free Convection Flow Past a Vertical Oscillating Plate – A. S. Butt and A. Ali	27	33
Electrohydrodynamic Peristaltic Flow of a Viscoelastic Oldroyd Fluid with a Mild Stenosis: Application of an Endoscope – N. T. M. El-dabe, G. M. Moatimid, M. A. Hassan, and D. R. Mostapha	38	45
Comparative Study of Forced Convection of a Power-Law Fluid in a Channel with a Built-in Square Cylinder – R. Mohebbi, M. Nazari, and M. H. Kayhani	55	64
Characteristics of Low-Temperature Short Heat Pipes with a Nozzle-Shaped Vapor Channel – A. V. Seryakov	69	80
Dynamics of Coupled Nonlinear Oscillators: The Formation of Long-Lived Vibrational States in the Case of Molecular Systems – G. A. Koval'skaya and A. K. Petrov	82	95
Dynamic Instability of Vibrating Carbon Nanotubes near Small Layers of Graphite Sheets Based on Nonlocal Continuum Elasticity – H. M. Sedighi and A. Yaghootian	90	105
Dynamic Impact on a Frozen Support Caused by Natural and Quasinatural Oscillations of an Ice Plate – A. G. Greshilov	101	118
Effect of the Thermal Relaxation and Magnetic Field on Generalized Micropolar Thermoelasticity – M. I. A. Othman and Y. Q. Song	108	126
Lattice Boltzmann Simulation of a Fluid Flow around a Triangular Unit of Three Isothermal Cylinders – J. Alinejad	117	136
Modeling of Emachining with the Use of a Curvilinear Electrode and a Stepwise Dependence of the Current Efficiency on the Current Density – L. M. Kotlyar and N. M. Minazetdinov	127	146
Formation of Heterogeneous Spatial Structures in a Boundary Lubrication Layer during Friction – Ya. A. Lyashenko	136	156
Dynamic Interaction of a Magnetized Solid Body with a Rarefied Plasma Flow – V. A. Shuvalov, N. A. Tokmak, N. I. Pis'mennyi, and G. S. Kochubei	145	167
Specific Features of Modeling of Nonequilibrium Radiation behind the Shock Wave in Air in the Vacuum Ultraviolet Spectral Range – V. A. Gorelov and A. Yu. Kireev	153	176
Oblique Impact of an Elongated Three-Dimensional Body on a Thin Liquid Layer – E. A. Batyaev and T. I. Khabakhpasheva	163	187
Flow of a Power-Law Nanofluid Past a Vertical Stretching Sheet with a Convective Boundary Condition – T. Hayat, M. Hussain, S. A. Shehzad, and A. Alsaedi	173	199

Experimental Study of the Separated Flow Structure behind a Backward-Facing Step and a Passive Disturbance - V. I. Terekhov, Ya. I. Smul'skii, and K. A. Sharov	180	207
Advective Flow in a Rotating Liquid Film - S. N. Aristov and K. G. Shvarts	188	221

Volume 57, Number 2, March–April, 2016

Viscous Liquid Film Flow Down an Inclined Corrugated Surface. Calculation of the Flow Stability to Arbitrary Perturbations Using an Integral Method - Yu. Ya. Trifonov	195	3
Use of Shutdown of the Capacitive Storage in Implementing Electrical Action on Metallic Shaped-Charge Jets - S. V. Fedorov	202	12
Test of a New Tip Material for Langmuir Probe Diagnostic - M. Y. Naz, S. Shukrullah, A. Ghaffar, N. U. Rehman, and Y. Khan	211	23
Uniqueness of Solution and Well-Posedness of the Problem of Determining the Fastening Parameters of a Pipe Containing Flowing Fluid A. M. Akhtyamov and G. F. Safina	219	32
Water Surface Waves in a Horizontally Oscillating Container - V. I. Bukreev	231	46
On the Mechanism of Self-Oscillations of a Supersonic Radial Jet Exhausting into an Ambient Space - S. P. Kiselev, V. P. Kiselev, and V. N. Zaikovskii	237	53
Linear Stability of the Couette Flow of a Vibrationally Excited Gas. 2. Viscous Problem - Yu. N. Grigor'ev and I. V. Ershov	247	64
Motion of a Viscous Fluid and a Wall in the Presence of a Stationary Wall V. L. Semitskii	258	76
Steady Flow of a Power-Law Non-Newtonian Fluid Across an Unconfined Square Cylinder - A. Pautokratoras	264	83
Theoretical-Experimental Method of Determining the Drag Coefficient of a Harmonically Oscillating Thin Plate - A. G. Egorov, A. M. Kamalutdinov, V. N. Paimushin, and V. A. Firsov	275	96
Three-Dimensional Flow of a Magnetohydrodynamic Casson Fluid over an Unsteady Stretching Sheet Embedded into a Porous Medium - A. S. Butt, M. N. Tufail, and Asif Ali	283	105
Flow around a Cylinder at the Beginning of the Critical Region - K. G. Dobrosel'skii	293	117
Study of Unsteady Performance of a Twin-Entry Mixed Flow Turbine - M. M. Bencherif, M. K. Hamidou, M. Hanel, and M. Abidat	300	124
Melting Heat Transfer in an Axisymmetric Stagnation-Point Flow of the Jeffrey Fluid - M. Nawaz, T. Hayat, and A. Zeeshan	308	132
Radiative Mixed Convection Flow of an Oldroyd-B Fluid over an Inclined Stretching Surface - M. Bilal Ashraf, T. Hayat, and A. Alsaedi	317	142
Non-Fourier Heat Conduction in an Exponentially Graded Slab - M. R. Raveshi	326	152
Thermophoretic Motion of Large Heated Aerosol Spherical Particles - N. V. Malai, A. V. Limanskaya, and E. R. Shchukin	337	161
Convective Heat Transfer in a Rotating Horizontal Cylindrical Fluid Layer - A. A. Vyatkin, A. A. Ivanova, and V. G. Kozlov	344	172
Temperature Strain Rate Deformation Conditions of Aluminum Alloys - D. A. Kitaeva, Sh. T. Pazylov, and Ya. I. Rudaev	352	182
Frictionless Contact of an Elastic Punch Subject to the Normal Load and Bending Moment - X. Jiang, G. Shao, and L. Zhu	359	190

Technique for Selecting the Functions of the Constitutive Equations of Creep and Long-Term Strength with One Scalar Damage Parameter – E. B. Kuznetsov and S. S. Leonov	369	202
Numerical Analysis on the Cutting and Finishing Efficiency of MRAFF Process – F. L. Lih	378	212

Volume 57, Number 3, May–June, 2016

Unsteady Self-Similar Viscous Flow near a Stagnation Point – O. A. Frolovskaya	391	3
Numerical Study of the Exact Solution of the Navier–Stokes Equations Describing Free-Boundary Fluid Flow – E. N. Zhuravleva	396	9
Transformation of the Bridge during Drop Separation – Yu. D. Chashechkin and V. E. Prokhorov	402	16
Pattern Formation in a Nonequilibrium Phase Transition for a Generalized Burgers–Fisher Equation – Q. Huang, J. Tang, L. Zhang, and K. Ouyang	416	32
Specific Features of Unsteady Exhaustion of a Gas–Particle Medium into Vacuum – D. V. Sadin and V. M. Varvarkii	422	39
Application of the Eulerian Approach to Simulating the Structure of an Upward Monodisperse Bubbly Flow in a Tube – M. A. Pakhomov and V. I. Terekhov	432	49
Effect of Sediment Particle Size on Bed Wavelength in Closed Conduits – Yu. G. Krat and I. I. Potapov	441	60
Three-Dimensional Flow of a Viscoelastic Fluid on an Exponentially Stretching Surface – M. Bilal Ashraf, T. Hayat, S. A. Shehzad, and H. Malaikah	446	65
Computational Analysis of Convective Instabilities in a Liquid Layer Subjected to an Inclined Gradient of Temperature – D. Nezar and S. Rahal	457	77
Viscous Dissipation and Thermal Radiation Effects on the Magnetohydrodynamic (MHD) Flow and Heat Transfer over a Stretching Slender Cylinder – M. Kalteh, S. Ghorbani, and T. Khademinejad	463	84
Free Convection Effects on a Vertical Cone with Variable Viscosity and Thermal Conductivity – G. Palani, E. J. Lalith Kumar, and K.-Y. Kim	473	96
Thermal Softening of Metallic Shaped-Charge Jets Formed by the Collapse of Shaped-Charge Liners in the Presence of a Magnetic Field – S. V. Fedorov	483	108
Experimental and Theoretical Study of the Buckling of Narrow Thin Plates on an Elastic Foundation under Compression – V. D. Kurguzov and A. G. Demeshkin	494	121
Experimental and Theoretical Analysis of the Deformation of Transversely Isotropic Plates under Creep Conditions – I. A. Banshchikova and V. A. Blinov	501	129
Numerical and Experimental Study on the Dynamic Behavior of a Sea-Star Tension Leg Platform Against Regular Waves – M. M. Abaiee, M. J. Ketabdari, A. Ahmadi, and H. Alemi Ardakani	510	139
Some Considerations on Instability of Combined Loaded Thin-Walled Tubes with a Crack – M. Shariati and A. Akbarpour	518	149
Slip Effects on a Mixed Convection Flow of a Third-Grade Fluid near the Orthogonal Stagnation Point on a Vertical Surface – T. Javed and I. Mustafa	527	159

Numerical and Analytical Study of the Propagation of Thermoelastic Waves in a Medium with Heat-Flux Relaxation - E. Yu. Vitokhin and M. B. Babenkov	537	171
Flexural-Gravity Circumferential and Radial Oscillations of a Plate Floating in Shallow Water - V. O. Shemelina	550	186
Effect of Thermal Exposure on the Residual Stress Relaxation in a Hardened Cylindrical Sample under Creep Conditions - V. P. Radchenko, M. N. Saushkin, and V. V. Tsvetkov	559	196
Technological Thermal Stresses in the Shrink Fitting of Cylindrical Bodies with Consideration of Plastic Flows - E. P. Dats and A. V. Tkacheva	569	208

Volume 57, Number 4. July–August, 2016

Opening of a System of Cracks - On the Mechanism of the Cyclic Lateral Eruption of the St. Helens Volcano in 1980 - V. K. Kedrinskii, M. N. Davydov, A. A. Pilnik, and A. A. Chernov	577	3
Stability of Two-Layer Fluid Flow - A. V. Rodionova and E. V. Rezanova	588	16
Unsteady Flow of a Dusty Bingham Fluid through a Porous Medium in a Circular Pipe - H. A. Attia, W. Abbas, A. L. Aboul-Hassan, M. A. M. Abdeen, and M. A. Ibrahim	596	26
MHD Flow and Heat Transfer of a Power-Law Non-Newtonian Nanofluid (Cu-H ₂ O) over a Vertical Stretching Sheet - M. Ferdows and M. A. A. Hamad	603	34
On the Problem of Free Deceleration of a Rigid Body in a Resisting Medium M. V. Shamolin	611	13
On Estimating the Complex Growth Rates in Ferromagnetic Convection with Magnetic-Field-Dependent Viscosity in a Rotating Sparsely Distributed Porous Medium - J. Prakash and R. Bala	623	57
Convective Diffusion from a Gas Phase to a Rotating Disk E. L. Pankratov and P. B. Boldyrevskii	637	71
Simulation of Optimum Conditions for Heat and Mass Transfer in Growing Large Crystals by Horizontal Directional Crystallization V. V. Gurov and A. G. Kirdyashkin	646	84
Generalized Thermoelastic Problem of an Infinite Body with a Spherical Cavity under Dual-Phase-Lags - R. Karmakar, A. Sur, and M. Kanoria	652	91
Improvement of Film Cooling Effectiveness with a Small Downstream Block Body - A. Khorsi, A. Guelailia, and M. K. Hamidou	666	107
Flow of a Thixotropic Fluid over an Exponentially Stretching Sheet with Heat Transfer - S. A. Shehzad, T. Hayat, and A. Alsaedi	672	114
Effect of Melting on an MHD Micropolar Fluid Flow Toward a Shrinking Sheet with Thermal Radiation - K. Das and A. Sarkar	681	125
Three-Dimensional Stress and Free Vibration Analyses of Functionally Graded Plates with Circular Holes by the Use of the Graded Finite Element Method - K. Asemi, H. Ashrafi, and M. Shariyat	690	136
Propagation of Converging Spherical Deformation Waves in a Heteromodular Elastic Medium V. E. Ragozina and O. V. Dudko	701	149
Free Vibrations of an Anisotropic Cylindrical Fiberglass Shell Reinforced by Annular Ribs and Containing Fluid Flow - F. S. Latifov, F. A. Seifullaev, and Sh. Sh. Alyev	709	158

Complex Fluctuations of Flexible Plates under Longitudinal Loads with Account for White Noise – E. Yu. Krylova, I. V. Papkova, N. P. Erofeev, V. M. Zakharov, and V. A. Krys'ko	714	163
Identification of the Elastic and Damping Characteristics of Carbon Fiber-Reinforced Plastic Based on a Study of Damping Flexural Vibrations of Test Specimens – V. N. Paimushin, V. A. Firsov, I. Gyunal, and V. M. Shishkin	720	170
Wave Processes in a Hollow Cylinder in an Inhomogeneous Prestress Field – A. O. Vatul'yan and V. O. Yurov	731	182
Extreme Conditions of Elastic Constants and Principal Axes of Anisotropy – N. I. Ostrosablin	740	192
Calculation of the Effective Stiffnesses of Corrugated Plates by Solving the Problem on the Plate Cross-Section – A. G. Kolpakov and S. I. Rakin	757	211

Volume 57, Number 5, September–October, 2016

Nonclassical Models of the Theory of Plates and Shells – B. D. Annin and Yu. M. Volchkov	769	5
Bonds between Metals and Nanocomposites Created by Explosion Welding – M. P. Bondar', E. V. Karpov, and Ya. L. Lukyanov	777	15
On the Load-Carrying Capacity of Structural Members – V. I. Van'ko	784	24
Experimental Study of the Inelastic Behavior of Materials – R. A. Vasin	789	30
Influence of the Cross-Sectional Shape of Tensile Bars on Their Creep Rupture Strength in a Corrosive Medium – A. M. Lokoshchenko and L. V. Fomin	792	35
Version of the Linear Elasticity Theory with a Structural Parameter – A. F. Revuzhenko	801	45
Analyzing the Deformation of a Porous Medium with Account for the Collapse of Pores – V. M. Sadovskii and O. V. Sadovskaya	808	53
Optimal Shapes of Axisymmetric Bodies Penetrating into Soil – V. L. Kotov, E. Yu. Linnik, and A. A. Tarasova	819	66
Green's Function for a Prestressed Thermoelastic Half-Space with an Inhomogeneous Coating – T. I. Belyankova and V. V. Kalinchuk	828	76
Free Vibrations of Circular Cylindrical Shells with a Small Added Concentrated Mass – G. S. Leizerovich and S. V. Seregin	841	90
Viscoelastic Problem for Piecewise Homogeneous Piezoelectric Plates – S. A. Kaloerov and A. A. Samodurov	847	97
Influence of Hydrogen on the Strength and Ductility of 30KhGSA and EI659 Steels in Quasi-Static and Shock-Loading Tests – V. A. Ogorodnikov, A. A. Yukhimchuk, M. A. Mochalov, A. V. Andramanov, A. Yu. Baurin, A. O. Blikov, I. E. Boitsov, S. V. Erunov, I. P. Maksinkin, I. L. Malkov, A. S. Pupkov, and E. V. Shevnin	859	111
Explosive Loading of Deformable Gas-Permeable Axisymmetric Structural Elements – E. G. Glazova, A. Yu. Konstantinov, A. V. Kochetkov, and S. V. Krylov	866	119
Experimental Study of the Effect of a Passive Porous Coating on Disturbances in a Hypersonic Boundary Layer 2. Effect of the Porous Coating Location – S. V. Lukashevich, S. O. Morozov, and A. N. Shipluk	873	127
Flow Structure in a Vortex Chamber – D. G. Akhmetov and T. D. Akhmetov	879	134

Finite Element Analysis of the Temperature Field in Laser Cladding of Ni-Based Powders on Teeth Surfaces of the Helical Gear – L. Chen, S. Liu, R. Tao, D. Liu, D. Lou, and P. Bennett	888	144
Research on the Skirt Tail Explosively Formed Projectile Stable Shaping Technology – W. Li, X. Wang, W. Li, and K. Chen	894	151
Computational Modeling of an MHD Flow of a Non-Newtonian Fluid over an Unsteady Stretching Sheet with Viscous Dissipation Effects – M. N. Tufail, A. S. Butt, and A. Ali	900	158
MHD Boundary-Layer Flow of a Non-Newtonian Nanofluid Past a Stretching Sheet with a Heat Source/Sink – M. Madhu and N. Kishan	908	167
On a Magnetohydrodynamic Flow of the Casson Fluid with Partial Slip and Thermal Radiation – S. A. Shehzad, T. Hayat, A. Alsaedi, and M. A. Meraaj	916	176
Lie Symmetry Analysis of a Double-Diffusive Free Convective Slip Flow with a Convective Boundary Condition Past a Radiating Vertical Surface Embedded in a Porous Medium – A. A. Affify and Md. J. Uddin	925	186
On Numerical Modeling of Capillary Flow Dynamics in a Microchannel Model by Using the Finite Element Method– C.-T. Lee, C.-C. Lee, J.-E. Lin, and M.-L. Liu	937	199
Analysis of Heat Transfer over a Plate in a Porous Medium with a Convective Boundary Condition – S. Mukhopadhyay and I. Ch. Mandal	949	212
Heat Enhanced by an Exothermic Reaction on a Fully Developed MHD Mixed Convection Flow in a Vertical Channel – C. Jayabalan, K. K. Sivagnana Prabhu, and R. Kandasamy	957	221

Volume 57, Number 6, November–December, 2016

Detonation Combustion of Hydrogen in an Axisymmetric Channel with a Central Body – Yu. V. Tunik	963	3
Acoustic Resonance Phenomena in Air Bleed Channels in Aviation Engines – A. A. Aleksentsev, A. N. Sazhenkov, and S. V. Sukhinin	971	12
The Role of External Influences in the Formation of Waves on the Surface of a Flowing-Down Film of a Viscous Fluid – O. Yu. Tselodub	979	22
Dynamics of the Distribution of the Main Parameters of the Magma Melt in the Volcano Slot Cross Section under Instantaneous Decompression – M. N. Davydov and V. K. Kedriuskii	985	29
Gas Pressure Equalization in a Porous Medium Filling a Pipe with a Closed End under Shock Loading – S. V. Khabirov	989	33
Thermal Analysis of a Flow of Immiscible Couple Stress Fluids in a Channel – J. Srinivas and J. V. Ramana Murthy	997	42
Axisymmetric Oscillations of a Cylindrical Droplet with a Moving Contact Line – A. A. Alabuzhev	1006	53
Self-Gravitating Stability of a Rotating Fluid Layer – A. A. Hasan	1016	64
Flow of a Viscous Fluid Past a Heterogeneous Porous Sphere at Low Reynolds Numbers – N. Srivastava	1022	70
Steady Laminar Mixed Convection Stagnation-Point Flow of a Nanofluid over a Vertical Permeable Surface in the Presence of a Magnetic Field – H. Tamim, S. Dinarvand, R. Hosseini, H. Rahimi, and I. Pop	1031	80

Generation of Mach Waves by Supersonic Jets – V. G. Pimshtein	1042	93
Influence of Thermal Radiation and Joule Heating in the Eyring–Powell Fluid Flow with the Soret and Dufour Effects – T. Hayat, Sh. Ali, A. Alsaedi, and H. H. Alsulami	1051	104
Decaying Surface Waves in Inhomogeneous Media – A. Begmatov	1061	115
Force Acting on a Particle in Unsteady Flow of a Pseudoplastic Fluid – O. B. Bocharov and Ya. S. Ignatenko	1069	124
Plane Problem of Filtration Consolidation for an Elastic Half-Space with Discontinuous Initial Conditions – F. M. Kadyrov, A. V. Kosterin, and E. V. Skvortsov	1076	132
Injection of Liquid Carbon Dioxide into a Reservoir Partially Saturated with Methane Hydrate – V. Sh. Shagapov, M. K. Khasanov, and N. R. Musakaev	1083	139
Mathematical Modeling of Heat Transfer in a Heat-Shielding Material – V. A. Ovchinnikov and A. S. Yakimov	1093	150
Two-Phase Flow Patterns of a Top Heat Mode Closed Loop Oscillating Heat Pipe with Check Valves (THMCLOHP/CV) – S. Thongdaeng, B. Bubphachot, and S. Rittidech	1101	160
Rate of Evaporation from the Free Surface of a Heated Liquid – M. Örvös, V. Szabó, and T. Poós	1108	168
Natural Vibrations of Corrugated Orthotropic Shells of Revolution – K. A. Vatul'yan, S. S. Makarov, and Yu. A. Ustinov	1118	180
Seismodynamics of an Underground Pipeline in Nonideal Contact with Soil: Effect of Sliding on Dynamic Stresses – M. Sh. Israilov, B. Mardonov, T. R. Rashidov	1126	189
Springback Analysis in Sheet Metal Forming by Using the Ramberg–Osgood Stress–Strain Relation – R. K. Lal, M. K. Bhagat, J. P. Dwivedi, V. P. Singh, and S. K. Patel	1133	197
Stresses in an Elastic Cylinder with Cylindrical Cavities Forming a Hexagonal Structure – A. G. Nikolaev and E. A. Tanchik	1141	206
