50

The need for all-aspect and broadband stealth to counter a wider array of radars is driving stealth aircraft design.

- 7 Feedback
- 8 Who's Where
- 9-10 First Take
- 11 Up Front
- 12 Going Concerns
- 13 Inside Business Aviation
- 14 Airline Intel
- 15 Leading Edge
- 16 Washington Outlook
- 64 Classified
- 65 Contact Us
- 65 Aerospace Calendar

DEFENSE

- 18 **What is the next step** for the U.S. Air Force's light-attack capability? Probably a combat trial
- 20 **Britain's Royal Air Force** sees new training fleet as an opportunity to increase pilot throughput
- 21 **U.S. Air Force** buys two Boeing 747-8Is, intended for failed Transaero, to replace Air Force One fleet
- 22 **Geostationary satellite** makers see continued decline in commercial orders as sector undergoes change
- 56 **U.S. Air Force chief** is leading the charge to create a joint, integrated network to maintain U.S. edge
- 57 **Operational road map** being drawn up by U.S. Air Force for hypersonic systems and weapons

- 59 **Classified defense** work is boosting bottom lines for prime contractors, CEOs confirm
- 60 **Iran's most** advanced weaponized UAV, recently shot down by U.S. F-15s, is in use at home and abroad

- 49 **SpaceX will continue** to parachute Dragon 2 for ocean landings to ease NASA safety certification

COMMERCIAL AVIATION

- 25 **Boeing 787-10** achieves flight-test milestone, tracing huge 787 outline over the U.S. in the process
- 26 **Three Pacific Rim** carriers have big plans for the A321neo, but engine problems are delaying deliveries
- 32 **Tensions mount** with suppliers as Boeing pushes into avionics and aviation support and services
- 33 **Frankfurt Airport** and Lufthansa search for common ground on handling low-cost carrier growth
- 35 **London City** opens to C Series services by Swiss, enabling growth for airport and airline

SPACE

- 24 **Cubesats** are making inroads into NASA science missions as low-cost data-gathering constellations

ON THE COVER

On-demand urban air transport is closer than you think. Graham Warwick details progress made in tackling the key challenges in a special report starting on page 36. Lilium artist's concept. Also in this issue: The future of turboprops (page 27), one-on-one with the U.S. Air Force chief (page 56) and F-35 point-counterpoint (page 61).

Aviation Week publishes a digital edition every week. Read it at www.aviationweek.com and on our app.

PROPULSION

- 27 **Though hybrid and** electric propulsion hold great promise, the age of the turboprop is not over
- 28 **Pushing beyond** efficiency gains possible with turboprops could lead to electrification of propulsion

AIRLINES IN TAIWAN

- 30 China Airlines** expands code-sharing, integrates subsidiaries and renews its fleet
- 31 Budget carrier** Tigerair Taiwan achieves profitability and plans to consolidate in its current territory

ON-DEMAND AVIATION

- 36 Urban air transport** may prove bigger than Uber, but Uber plays a crucial role in its creation
- 38 Electric vertical** takeoff and landing could enable faster, cheaper on-demand service than helicopters
- 38 More progress is** needed for batteries if commercial eVTOL operations are to begin in 2020s
- 40 Airworthiness rules** are designed to keep pace with innovation, but urban air mobility will test them
- 41 Industry grapples** with reducing, quantifying “virtual noise” of high-density urban air-taxi operations
- 42 Airspace access** is a big challenge to Uber and others planning fleets of aircraft for on-demand service

GENERAL AVIATION

- 44 EAA AirVenture** set the stage for new technology in space, electric propulsion and personal transport

TECHNOLOGY

- 46 UTRC Ireland** makes headway on developing and integrating model-based aircraft design tools
- 47 GE backs startup** working on metal 3D-printing process that it says is 20 times cheaper, 100 times faster

STATE OF STEALTH

- 50 Next steps in** technology to evade radars are explored in this sixth article in the award-winning series

DIRECTED-ENERGY WEAPONS

- 55 U.S. Air Force** Research Laboratory expects delivery of a flight-ready high-power laser within 36 months

POINT/COUNTERPOINT

- 61 An F-35 pilot and** an F-35 critic debate the Lockheed Martin fighter's strengths and weaknesses

LETTER FROM THE EDITOR

- 66 Aviation Week** opens bureau at Cape Canaveral as it intensifies its focus on “new” space
