# 40

The unprecedented rate of long-range missile testing by North Korea has added a new level of urgency to the Trump administration's review of U.S. missile defenses.

## DEFENSE

**16 France and Germany** propose a European answer to the F-35 and look at other military cooperation

## COMMERCIAL AVIATION

**18 Airlines are concerned** Brexit could mean regulatory chaos for European air transport

**19 Norwegian Air's** ambitious expansion plans depend on overcoming multiple obstacles

**21 U.S. legacy carriers** delay widebody orders, weighing Boeing's New Midsize Airplane and other options

## PROPULSION

**24 Firefly returns**, bolstered by new funding, to develop an upgraded small-satellite launch vehicle

**24 Low-cost, unmanned** combat aircraft drive need for less expensive powerplants

**26 Aquatic UAV** technology developed for environmental sampling could be used for intelligence-gathering

## CONNECTED AEROSPACE

**28 Low-cost, long-haul** carriers study cabin connectivity options to draw passengers and drive profits

## AERONAUTICAL ENGINEERING

**30 NASA develops** an airliner concept that could reduce noise by 90% and enable continued capacity growth

## SPACE

**31 Small satellites** are popular, but industry analysts warn that their revenue potential is uncertain

## DEFENSE

**32 MiG-35 steals** spotlight at MAKS air show near Moscow as Russian aerospace pivots to next generation

**34 Austria aims to** replace its Eurofighters by 2020 with supersonic-capable aircraft

**35 Agricultural aircraft** are taking on the role of low-cost, long-endurance strike platforms

**37 Japan makes progress** on its Future Fighter engine, which will be much larger than predecessor

**39 South Korea is close** to deploying a ballistic missile featuring a maneuverable reentry vehicle

## ON THE COVER

Loss of control and upset recovery remain a major concern in general aviation and at airlines. Senior Editor for Avionics and Safety John Croft reports on new symbology and techniques that might help. Cover photo by Nathan Richards/Barron Associates. Also in this issue: France and Germany plan Europe's answer to the F-35 (page 16), a new urgency to missile defense (page 40) and U.S. legacy carriers hold back on widebody aircraft orders (page 21).

Aviation Week publishes a digital edition every week. Read it at [www.aviationweek.com](http://www.aviationweek.com) and on our app.

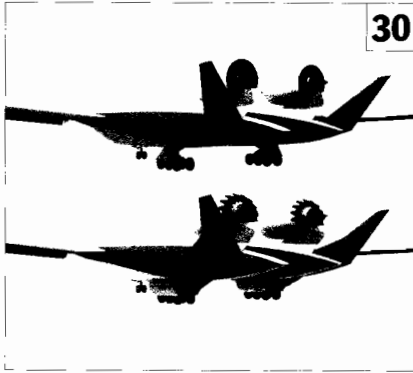

## MISSILE DEFENSE

- 40 North Korea's** accelerated missile testing adds urgency to tests and upgrades of U.S. interceptors
- 42 First ICBM target** intercept by the Ground-Based Midcourse Defense system, illustrated step by step

## INTERVIEW

- 44 CEO says acquisition** of B/E Aerospace will make Rockwell Collins a leader in smart airplanes

- 50 Electrics and** new regulations combine to open the way for a revitalization of general aviation

- 50 Sikorsky boosts** marketing for its versatile and rugged twin-engine turboprop built by PZL Mielec

- 53 Airbus plans to** fly its urban air mobility demonstrator by 2018 and production prototype by 2023

## AIRLINES

- 54 Lessors owned by** low-cost carriers target third-party business as the next phase in their evolution

## EDITORIAL

- 58 UK leaders need** to quickly figure out how to preserve their enviable aerospace sector as Brexit looms

- 58 U.S. Space Council** reestablishment is encouraging, but NASA needs a new administrator now

## GENERAL AVIATION

- 46 Aviation Week** flight tests a new upset recovery guidance system to help prevent loss of control
- 48 New aftermarket** autothrottle manages power and observes limits for non-Fadec turboprops
