36

The U.S. Air Force plans to restore and modify up to 450 Minuteman III underground silos between 2023 and 2035 to support the Ground-based Strategic Deterrent program.

COMMERCIAL AVIATION

- 20 **Comac C919** first prototype resumes flight testing after unusual delay since initial flight
- 22 **China's ARJ21** is headed for volume production despite poor dispatch reliability and operating limits
- 23 **Beijing and Moscow** will cooperate on initial engine research for their joint widebody aircraft, the CRJ929
- 24 **Lufthansa and EasyJet** expect to benefit from Air Berlin bankruptcy deals
- 26 **ATR's new marketing** efforts are paying off with firm orders in the U.S., India and China
- 27 **Inmarsat poised** to launch first hybrid inflight Wi-Fi service with its European Aviation Network

BUSINESS

- 28 **Sale of Orbital ATK** marks the end of an era—sort of—for new-space company founder David Thompson

TECHNOLOGY

- 30 **DARPA taps** Reaction Engines to test precooler heat exchanger at heart of its Sabre rocket concept

DEFENSE

- 31 **New space systems** leader for U.S. Air Force seeks to streamline, speed acquisition programs
- 33 **U.S. Air Force** revises its rules in air war over Syria, empowering pilots to make critical decisions
- 35 **Three new problems** troubling the KC-46A program that is already behind schedule and over cost

- 36 **U.S. Air Force** is looking for “every opportunity” to speed up the next-generation ICBM program

- 37 **Qatar signs for** three fighter types in rapid seven-fold expansion of combat aircraft capabilities

- 39 **Enhanced sensors** drive update to Eurofighter Typhoon cockpit with wide-area displays and more

- 40 **Industry gears up** for £1 billion of commercial flight-training work for the British armed forces

ISR

- 41 **Small tactical** unmanned aircraft, long essential to military operations, are becoming smarter

- 43 **Israel developing** wide-area surveillance UAVs and a system of a thousand scattered sensors

SPACE

- 44 **Stratolaunch tests** engines for its huge space launch aircraft, hopes for flight tests early next year

- 45 **NASA looks to** New Frontiers funding to fill void in outer Solar System exploration post-Cassini

ON THE COVER

Airlines and the U.S. Air Force alike are struggling to shore up the pilot pipeline. Reports by John Croft, Bradley Perrett and Lara Seligman begin on page 56. Sporty's Pilot Shop photo. Also in this issue: Safran unveils a propulsion road map (page 51), the satellite industry in transition (page 46) and Qatar's ambitious fighter fleet expansion (page 37).

Aviation Week publishes a digital edition every week. Read it at AviationWeek.com/awst and on our app.

AVIATIONWEEK
& SPACE TECHNOLOGY

Addressing the Pilot Shortage

- 46 Euroconsult forecasts** that next three years will be “transformational” for the satellite industry
- 48 NASA and partners** pursue technology demos to prepare for Mars, other deep-space missions
- 49 International space** exploration planning group works on road map to sidestep Moon-Mars debate
- 50 Beijing discusses** addition of other countries’ modules at its planned space station’s Shenzhou dock

PROPULSION

- 51 Safran’s hybrid** and all-electric propulsion plan is paced by energy storage and transmission advances
- 54 Rolls-Royce** is studying hybrid-electric regional aircraft that could be market game changers
- 55 GE’s advanced** power inverter could be a precursor to viable hybrid-electric aircraft propulsion

PILOTS

- 56 U.S. airlines** look beyond bonuses for sustainable strategies to shore up the eroding pilot pipeline 
- 58 China’s civil** aviation administration lowers its famously high physical standards for airline pilots
- 59 U.S. Air Force** considers contracting out initial pilot training to universities, companies

MANUFACTURING

- 60 Airbus looks** to double its Chinese sourcing in three years; others take a different approach
- 63 Boeing sees** Zhoushan 737 MAX facility as “win-win” for production capacity and Chinese customers

VIEWPOINT

- 66 Ex-Im Bank** should support U.S. spare-parts companies to help them compete better globally
