

## FEATURES

- 18 | Scramble for Higher Ground**  
Manufacturers diversify spacecraft and operating orbits to keep up with changing markets
- 34 | UAS in the NAS**  
FAA preps proposed rulemaking for remote ID and tracking of unmanned aircraft as crucial next step in airspace integration
- 38 | 'A Fight to the Death'**  
Spirit AeroSystems President/CEO Tom Gentile discusses pricing pressure, tomorrow's technologies
- 44 | Strategic Imperative**  
Service entry nears for the KC-390, but work continues to develop its tactical capabilities
- 58 | Cautious Contender**  
With its next-generation jets, Embraer aims to break into new segments of the airline market

## SPACE

- 20 |** Rocket Lab begins commercial small-satellite launch service
- 21 |** Blue Origin aims to compete for U.S. national security launches
- 53 |** FCC probing unauthorized launch of Swarm Technologies nanosats
- 54 |** China's rapid-response rocket is prominent in 2018 program
- 55 |** Chinese are working on a giant engine for the Long March 9

## COMMERCIAL AVIATION

- 23 |** ICAO's GADSS involves more than aircraft tracking
- 24 |** Fleet simplified, Aeromexico eyes Delta joint-venture options
- 25 |** Airlines have questions despite progress in Brexit process

**36 |** DroneHunter carries Fortem Technologies' 1.5-lb. TrueView radar for UAS detection and tracking.

- 26 |** Boeing begins 777 EcoDemonstrator flight tests
- 28 |** New Zealand welcomes flight trials of Kitty Hawk's eVTOL air taxi
- 29 |** Tail rotor electrification could pave way to rotary-wing hybridization

## VERTICAL FLIGHT

## PROPULSION

- 30 |** GE sees Catalyst as engine for change in turbo-prop push
- 32 |** Leap engine deliveries to Airbus remain challenging

## AIR TRAFFIC MANAGEMENT

- 33 |** Solutions to streamline Europe's air traffic emerge

## UNMANNED AIRCRAFT

- 36 |** As counter-UAS products gain ground, swarm threat looms

## CARGO AIRCRAFT

- 40 |** E-commerce boosts demand, putting Atlas Air in growth mode
- 41 |** Electric record holder launches inexpensive cargo drone

## DEFENSE

- 42 |** Software lets manned/unmanned teams fight despite jamming
- 43 |** Boeing's next-gen Super Hornet will be stealthy—sort of
- 47 |** International militaries are becoming targets for lessors
- 48 |** Momentum builds for U.S. Air Force light attack buy
- 50 |** Taiwan considers F-35 purchase and upgrades its F-CK-1 fighters
- 51 |** Saudi-UK agreement gives the Eurofighter a shot in the arm
- 52 |** Could F-16s in battle communicate via commercial internet?

## FAST FIVE

- 57 |** Arianespace CEO on Ariane 5 mishap and Ariane 6 development

## LOW-COST CARRIERS

- 62 |** Argentina's economic reform creates opportunities for airlines

## VIEWPOINT

- 66 |** Brexit process is destabilizing the British aerospace industry

## ON THE COVER

Startup Rocket Lab's Electron small-satellite launcher is scheduled to fly its first operational mission in April. Rocket Lab plans to launch six or seven operational missions this year and aims to fly every week by 2020. Cape Canaveral Bureau Chief Irene Klotz's report on the burgeoning commercial satellite market begins on page 18. Rocket Lab photo.
