

FEATURES

22 | Crunch Time

Delivery delays loom for 737s as supplier delays force Boeing to store unfinished aircraft at Renton

32 | New Space's New Space

The new space economy is diversifying with service providers eyeing smallsats and more

46 | Plug to Play

Interest in hybrid-electric technology is growing as limitations of all-electric become more clear

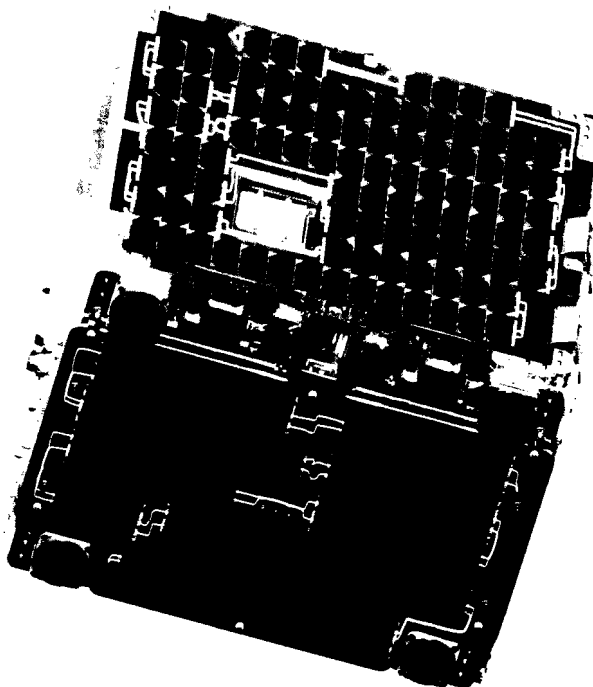

50 | Urban Expansion

Is technology for electric vertical-takeoff-and-landing air taxis advancing fast enough?

58 | Long-haul LCCs Gain Momentum

Airlines around the world see potential for low-cost, long-haul travel, but Asian operators lead

32 | RemoveDebris spacecraft tests techniques for eliminating orbital debris.

COMMERCIAL AVIATION

- 24 | Airline employee's fatal flight in stolen Q400 raises security issues
- 25 | Ryanair needs to control labor costs but avoid damaging strikes
- 60 | With Boeing 787 deliveries years away, Hawaiian makes plans

DEFENSE

- 27 | Tactical boost glide developments accelerate as U.S. weighs options
- 28 | Space Development Agency is first step to creating U.S. Space Force
- 29 | Economic woes cast doubt on Turkey's defense supplier ambitions
- 40 | Why Lockheed Martin's radar won Japan's Aegis Ashore competition
- 41 | Turkey's Hurjet trainer is to build fly-by-wire, supersonic experience
- 42 | Israel looks to expand its F-15 fleet and upgrade those it already has

- 43 | U.S. think tank urges teaming manned, unmanned fighters

SPACE

- 30 | Parker solar probe launches as namesake watches liftoff

BUSINESS

- 35 | Surging mergers and acquisitions may soar to new levels

TECHNOLOGY

- 37 | Liquid rechargeable battery offers better safety, energy density
- 38 | Solar-powered nearly 26-day Zephyr flight breaks own records

UNMANNED AVIATION

- 45 | Xwing reveals plans to bring autonomy to GA, eVTOLs

SAFETY

- 54 | Risks of lithium-ion-powered electronics draw new scrutiny

- 55 | GPS outages raise concern as U.S. dependence on satellite nav grows

MANUFACTURING

- 57 | Mitsubishi Heavy Industries pushes consolidation in Japan

LOW-COST CARRIERS

- 61 | Canadian ULCCs growing but face challenges

VIEWPOINT

- 66 | Contrasting views on future of commercial pilots

ON THE COVER

The two-seat Volocopter 2X flies autonomously over Dubai, illustrating how advances in electric propulsion are enabling new markets such as urban air mobility using autonomous taxis. Graham Warwick reports starting on p. 46 about different electrification technologies and strategies. Starting on p. 50, he looks at how the urban air mobility is evolving. Credit: Volocopter
