- 66 | GPS augmentation at the airport: U.S. locales lack the system

LETTER FROM THE EDITOR

- 74 | Aviation Week seeking outside submissions for awards

ON THE COVER

Experience gained during development of the Lockheed Martin F-35 could help planners and designers avoid the same challenges with the next generation of fighters. Graham Warwick's report begins on page 44. Photo of an F-35C loaded with external weapons over the U.S. East Coast during development testing by Lockheed Martin.

Aviation Week publishes a digital edition every week. Read it at AviationWeek.com/awst
