

Magazine was founded in the year 1932 • Moscow

Quarterly scientific and technical magazine

Publication of Department of the Aviation Industry,  
the RF Ministry for Industry and Trade,  
and  
National Institute of Aviation Technologies

## CONTENT

	Pp.		Pp.
<b>AIRCRAFT ENGINEERING</b>			
<b>Brusov V.A., Merzlikin Yu.Yu., Menshikov A.S.</b> Search of optimal solutions on control by elastic-damping characteristics of shock struts chassis for the purpose of decrease in loadings of soil basing airplanes at operation on uneven runways . . . . .	4	model wing console by correction of themilling cutter rotation frequency . . . . .	47
<b>Siluyanova M.V., Alendar A.D., Grunin A.N.</b> Development of technical appearance and investigation of effective characteristics of power plant of perspective supersonic passenger aircraft . . . . .	9	<b>Egorov V.N., Egorov A.V.</b> Compression of a thin-walled cylinder by an external elastic medium . . . . .	52
<b>Voityshen V.S., Semenov V.N.</b> FEM model application for aeroelasticity characteristics of the airplane investigation . . . . .	15	<b>MATERIALS AND METALLURGY</b>	
<b>Buzuluk V.I., Bashkirov I.G., Vermel V.D. etc.</b> Free-flight aerodynamic models of aircrafts for research on high flight speeds . . . . .	21	<b>Erasov V.S., Oreshko E.I.</b> Submission of the Hooke law in the conditions of volume deformation for mono-axial and biaxial loading . . . . .	56
<b>ENGINE BUILDING</b>			
<b>Vikulin A.V., Kruzhalov A.G., Marishkin V.V.</b> Explore effects of constructive parameters on hydraulic characteristics of the nozzle blades of the power turbine . . . . .	25	<b>QUALITY, RELIABILITY, SERVICE LIFE</b>	
<b>Stashkiv M.S., Yanovsky L.S., Shevchenko I.V.</b> Experimental research of characteristics of burning of endothermal fuel thermodestruction products in a subset air flow . . . . .	32	<b>Valynga S.O., Torpachev A.V.</b> Formulation and solution of tasks of development of the stand for testing of fuel-control systems and automatic control systems of jet engines . . . . .	65
<b>Vikulin A.V., Yaroslavtshv N.L., Zemlyanaya V.A.</b> Improvement of the calorimetry technology of the gas turbine engine parts in the liquid-metal thermostat . . . . .	36	<b>Agamirov L.V., Stashkiv M.S., Shevchenko I.V.</b> Energy model of reducing the fatigue limit of aviation materials as a result of preliminary cyclic loading . . . . .	67
<b>Torpachev A.V., Sovetnikov Ya.N.</b> Numerical simulation of spray incompressible fluid of spherical nozzles . . . . .	43	<b>Vermel V.D., Kazhichkin S.V., Lacoef K.F. etc.</b> Compact strain-gage balance for aerodynamic control surfaces loads measurement as part of aerodynamic models design . . . . .	74
<b>TECHNOLOGY PROBLEMS</b>			
<b>Vermel V.D., Bolsunovsky S.A., Gubanov G.A. etc.</b> Elimination of vibrations on milling of the aerodynamic		<b>Kovalev I.E., Semenov V.N., Oleinikov A.I.</b> Laminated composite stiffness and strength estimation for thin-walled structure . . . . .	79
		<b>ECONOMICS AND ORGANIZATION OF PRODUCTION</b>	
		<b>Siluyanova M.V., Kraev V.M., Tikhonov A.I.</b> Life cycle simulations modern domestic aircraft engine framework . . . . .	82
		<b>INFORMATION</b>	
		<b>Shtrikman M.M.</b> From welded household products of Ancient Egypt up to welded Russian aircraft . . . . .	88
